Great, but you can take this out. It has already been approved and sent out.

Let me know when I can send to EOC.

In addition, EPA Administrator Gina McCarthy today sent the below directive to Regional Administrators regarding ongoing field work at mines:

While we continue to investigate the root causes of last week's release of mining waste at the Gold King Mine in Colorado, we are instructing our Regions to immediately cease any field investigation work at mines including tailings facilities, unless there is imminent risk in a specific case. We are in the process of initiating an independent assessment by a sister federal agency or another external entity to examine the factors that led to last week's incident. Based on the outcome from that assessment, we will determine what actions may be necessary to avoid similar incidents at other sites. While we stand down on existing field investigations and assessments at these mining sites, we also are instructing our Regions to identify existing sites with similarities to the Gold King Mine site and to identify any immediate threats and consider appropriate response actions.

Tom doesn't want to edit. Will you take a look and see if it's what you want? This needs to be approved by David.
